# **TOPSUN HEATING** **THE INNOVATIVE TECHNOLOGY**

TopSUN Heating Inc. is an international Canadian-Iranian manufacturer headquartered in British Columbia focused on developing innovative, green and smart electric heating solutions.

Our goal is the global use of new and innovative electric heating equipment that leads our users to safe and green sources of energy.

TopSUN products are the result of commitment to research, product innovation and exceptional services, which are produced and supplied according to the needs and requests of heating system users for more comfort and easier life.

We want to change the way people heat by developing heating systems that are smarter , easier to use and maintenance-free, while using less energy, being more cost-effective and offering modern, luxurious comfort.

With TopSUN electric heating technologies, we strive to create a smart, green, sustainable, affordable, luxurious and modern future for all of us.

**+15 YEARS INNOVATION  
HISTORY**

# **TOPSUN**

A woman with dark hair, wearing a white short-sleeved shirt and a blue and white striped apron, is shown from the chest up. She is looking down, and her hands are near a stainless steel sink. The background is a solid red color with thin, white, curved lines that create a geometric pattern. The text 'Thermo Panels' is written in a large, bold, white font, and below it is a bulleted list of two items: 'Wall Panel Radiators' and 'Towel Dryer'.

Surface	0.55 m <sup>2</sup>
Custom Image	Yes

# MONO-PART DECORESUN RADIATORS

Dimensions	50 × 150 cm
Coverage Area	11 - 13 m <sup>2</sup>
Power Consumption	500 Watts
Remote Control	Yes
Ambient Thermostat	Yes
Surface	0.75 m <sup>2</sup>
Custom Image	Yes

## D-904 WALL RADIATOR

# D-905

---

## WALL RADIATOR

Dimensions	90 × 90 cm
Coverage Area	10 - 12 m <sup>2</sup>
Power Consumption	500 Watts
Remote Control	Yes
Ambient Thermostat	Yes
Surface	0.81 m <sup>2</sup>
Custom Image	Yes

# MONO-PART DECORESUN RADIATORS

Dimensions	90 × 110 cm
Coverage Area	12 - 15 m <sup>2</sup>
Power Consumption	700 Watts
Remote Control	Yes
Ambient Thermostat	Yes
Surface	0.99 m <sup>2</sup>
Custom Image	Yes

## D-906 WALL RADIATOR

# MONO-PART DECORESUN RADIATORS

Dimensions	90 × 150 cm
Coverage Area	15 - 18 m <sup>2</sup>
Power Consumption	800 Watts
Remote Control	Yes
Ambient Thermostat	Yes
Surface	1.35 m <sup>2</sup>
Custom Image	Yes

## D-907 WALL RADIATOR

# MONO-PART DECORESUN RADIATORS

Dimensions	90 × 200 cm
Coverage Area	18 - 20 m <sup>2</sup>
Power Consumption	900 Watts
Remote Control	Yes
Ambient Thermostat	Yes
Surface	1.80 m <sup>2</sup>
Custom Image	Yes

## D-908 WALL RADIATOR

# MONO-PART DECORESUN RADIATORS

Dimensions	60 × 60 cm
Coverage Area	3 - 4 m <sup>2</sup>
Power Consumption	200 Watts
Remote Control	Yes
Ambient Thermostat	Yes
Surface	0.36 m <sup>2</sup>
Custom Image	Yes

## D-909 WALL RADIATOR

# MONO-PART DECORESUN RADIATORS

Dimensions	60 × 80 cm
Coverage Area	4 - 6 m <sup>2</sup>
Power Consumption	250 Watts
Remote Control	Yes
Ambient Thermostat	Yes
Surface	0.48 m <sup>2</sup>
Custom Image	Yes

## D-910 WALL RADIATOR

# MONO-PART DECORESUN RADIATORS

Dimensions	60 × 110 cm
Coverage Area	10 - 12 m <sup>2</sup>
Power Consumption	400 Watts
Remote Control	Yes
Ambient Thermostat	Yes
Surface	0.66 m <sup>2</sup>
Custom Image	Yes

## D-911 WALL RADIATOR

# D-912

---

## WALL RADIATOR

Dimensions	60 × 130 cm
Coverage Area	11 - 13 m <sup>2</sup>
Power Consumption	500 Watts
Remote Control	Yes
Ambient Thermostat	Yes
Surface	0.78 m <sup>2</sup>
Custom Image	Yes

# The installation guide for DecoreSUN heating panels

## Required Equipment:

- 1- Marker / Pencil / Pen
- 2- Ruler
- 3- Metal Tape Measure / Cloth Tape Measure
- 4- Hammer
- 5- Square / Level
- 6- Drill Machine
- 7- Diamond Drill Bit Grade 8 (8mm diameter)
- 8- Drill Bit Grade 8 (6mm diameter)
- 9- Screws (appropriate for the drill bit diameter)
- 10- Screwdriver"

## Settings for models with remote-controlled dimmers:

Button : Turns on the entire panel.

Button : Turns off the entire panel.

Electric Radiators:

Dimensions 200×90 | 150×90 cm: 4 zones | Each AIBICID button activates/deactivates one zone.

Dimensions 130×60 | 150×50 cm: 3 zones | Each AIBIC button activates/deactivates one zone.

Dimensions 110×90 | 90×90 | 80×60 | 110×60 | 110×50 | 90×50 cm:

- Using buttons AIC reduces the generated temperature by half (half of the panel on).
- Using buttons BID increases it to the maximum (entire panel on).

"If you are installing the panel on ceramic walls, drywall, or blocks, it is necessary to replace the mentioned drill bit in the panel installation guide with specialized drill bits (such as butterfly drill bits) or other relevant equipment suitable for the type of

**Step 1** - Selecting and marking a reference point on the wall to initiate the installation process.

Note: The reference point selection should be compatible with the panel's orientation (horizontal and vertical), its dimensions, and maintaining the distance of the panel from the surrounding walls accurately. Suggestion: It's better to choose the reference point from the top part of the panel.

**Step 2** - Measuring the distance from the reference point to the horizontally aligned point corresponding to the panel's size dimensions and hole spacings, and marking it.

**Step 3** - Drawing a line between the reference point and the aligned point and verifying the alignment using a square or level.

**Step 4** - Drilling holes at the marked points using the diamond drill bit grade 8 and a drilling machine.

**Step 5** - Placing the drill bit holders in the drilled holes using hammer strikes.

**Step 6** - Removing the heating panel from its box and disassembling the metal fixtures by rotating them in a clockwise direction.

**Step 7** - Attaching piece 1 of the metal fixtures to the drill bit holders using screws and a screwdriver (clockwise direction).

**Step 8** - Positioning the panel against piece 1 of the metal fixtures and attaching piece 2 by passing it through the panel's holes into piece 1.

**Step 9** - Marking two remaining drilling spots on the wall and repeating steps 3 to 8.

**Step 10** - Connecting the heating panel wire to the power outlet."
